### Choose one of the following services

\*Cost of test \$30.00 per test. This is the basic service option for Veterinarians. It is also the common choice for Breeders who are looking for an accurate PVC screening of their dogs. When they receive your cassettes or digital scans, their certified Technicians will carefully scan them at once and generate a Hospital quality report, complete with a clear PVC summary added to the cover page. This is a manual scan, not a computer generated scan. **Checks must be made out to Alba Medical and mailed with the audio tape once recording is done.**

\*Cost of test \$80.00 per test. This is a more in-depth service for customers who want a Cardiologist overview of their study. The cassette or digital scan is processed as in the above service. The final report is then sent to their Cardiologist instead of directly to you. The Cardiologist will then send a report to you. This is an option typically used for customers who want more of a health screening other than for breeding. **Checks must be made out to Alba Medical and mailed with the audio tape once recording is done.**
